Ubuntu x64 download

From the official Ubuntu website (https://ubuntu.com) select **Download** → **Get Ubuntu Desktop.**

And by scrolling down a bit, we choose the version we're going to download.

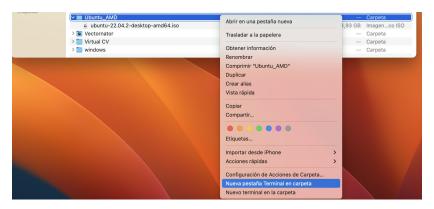

The download will start, and once it's finished, we need to perform a verification. On the same page where the download starts, if we click on *verify your download*,

a window will expand showing the command we need to copy and paste into the terminal, along with the expected output.

Thank you for downloading Ubuntu Desktop

Now, in the folder where we downloaded the file, we right-click and select *Open in New Tab in Terminal*.

And in the terminal, we copy and paste the command.

```
Ubuntu_AMD — -zsh — 80x24

jorgecamachoochoa@MBP-de-jorge Ubuntu_AMD % echo "b98dac940a82b110e6265ca78d1320
f1f7103861e922aa1a54e4202686e9bbd3 *ubuntu-22.04.2-desktop-amd64.iso" | shasum -
a 256 --check
```

We press Enter and wait a little while to see the result.
